ABOUT ME

Software Developer with excellent English language skills and expertise in a range of programming languages and technologies, such as JavaScript, TypeScript, ReactJS, and web development frameworks. I'm also experienced with relational and non-relational databases and other current technologies. I thrive on exploring new topics and am highly capable of fulfilling specified requirements.

EXPERIENCE

BULL MARKETING – IGLU MARKETING DIGITAL

(12/2023-Present)

Full Stack Developer

- Developed and maintained robust full-stack web applications for key clients including Budweiser, Stella Artois, Cerveza Corona, Newell Brands, Mobil, Terpel, and Coexito.
- Managed the complete development lifecycle, implementing backend and frontend logic with Laravel, Livewire, and PHP, and designing MySQL database structures.
- Built dynamic and modern user interfaces using React and JavaScript to enhance user experience and platform interactivity.
- Participated in the design and implementation of technical solutions to meet client requirements and specifications across various digital campaigns and projects.
- Contributed to full-stack development, with an initial focus on the frontend, for the creation of dynamic promotional campaigns for Budweiser.

SOFTGIC

(04/2021-10/2021)

Software Development Internship

- Developed for the Claro Giros project using JavaScript, jQuery, CSS, and HTML, focusing on delivering smooth user experiences.
- Collaborated with the team to implement features, optimize performance, and resolve issues.
- Demonstrated strong problem-solving skills and effective communication to meet client expectations.
